RETURN RECEIPT REQUESTED

JEAN SMITH
65 S 500 W
DELTA UT 84624

Dear Ms. Smith:

On July 19, 2001, a surface compliance inspection was conducted at the site of your Notice serialized UTU-078266, located in the E $\frac{1}{2}$ SW $\frac{1}{4}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 31, T. 13 S., R. 19 W.

The inspection revealed no problems on the ground. However, there are some discrepancies in the Notice that need to be addressed.

The Notice stated that the activity would take place on the Cotton Blossom #4 claim, UMC 365983. Our records indicate that the Cotton Blossom #4 was abandoned and void by the time you submitted the notice on September 1, 1999. On September 24, 1999, you located the Cotton Blossom #'s 1-9 UMC's 366647-55, however, you have not revised your Notice to reflect the change in the mining claim.

The enclosed map is a copy of the one submitted with your notice. Please note that there is a discrepancy between the site indicated on the map as your mine site, and the old prospect site where we believe you intend to conduct operations. We are enclosing another map we have made that illustrates the discrepancy.

The Notice also includes that the roads to the site will be improved, and about two miles of roads are indicated on the map submitted with it. The road indicated in red on the map

RECEIVED
JUL 27 2001
DIVISION OF
OIL, GAS AND MINING

may be improved as long as it is not widened. If the other road is improved, you must include it in your disturbed acreage and reclamation plan.

Please use the enclosed map to clearly indicate where you plan to conduct operations, and what, if any roads you intend to improve, and return it to us with a letter stating the mining claim that encompasses the mine. If you wish, we can meet you on site, and determine the exact size and location of your operations through a Global Positioning System.

If you have any questions, please feel free to contact Sheri Wysong at 435-743-3124.

Sincerely,

A handwritten signature in dark ink, appearing to read "Jerry W. Mansfield". The signature is fluid and cursive, with the first name "Jerry" being the most prominent.

Jerry Mansfield
Geologist
